My Skills

Front-End Development

Proficient in HTML, CSS, and JavaScript. Experienced in building responsive and user-friendly interfaces.

Back-End Development

Skilled in Node.js, Express, and RESTful API design. Comfortable working with databases and server-side logic.

Frameworks and Libraries

Familiar with React, Angular, and Vue.js. Adept at leveraging these tools to create efficient and scalable applications.

Services

1 ### Website Design

Crafting visually appealing and user-friendly websites that reflect your brand's identity.

2 ### Web Development

Building robust, responsive, and feature-rich web applications using the latest technologies.

3 ### SEO Optimization

Optimizing websites to improve search engine visibility and drive more organic traffic.
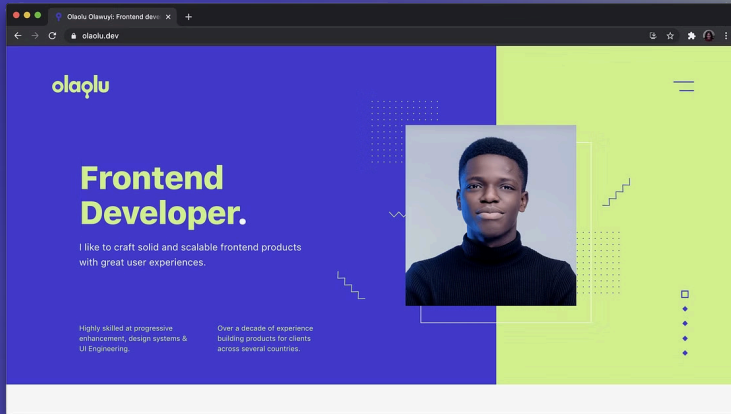

4 ### Maintenance and Support

Providing ongoing website maintenance, updates, and technical support to keep your site running smoothly.

Salesforce consulting >

We analyze business environment and propose a plan of Salesforce cloud services implementation based on business data and long-time expertise. Our expert team provides professional Salesforce consulting services at an enterprise level.

Salesforce implementation >

At WaveOC, we pay attention to the process of Salesforce implementation. Our expert team collects requirements, develops and sets up different Salesforce features and test the system to ensure best performance and efficiency.

My Projects

1 **E-commerce Website**

Developed a fully functional e-commerce platform with a modern and intuitive user interface.

2 **Personal Portfolio**

Designed and built this personal portfolio website to showcase my skills and experience.

3 **Blog Application**

Implemented a responsive and feature-rich blog application with a content management system.
